Legends Start Here

Game changer, space saver

Small footprint, massive performance

No more playing around. Small, powerful Intel® NUC 11 Extreme Kits are designed for domination with 11th Gen Intel® Core™ processors and support for full-size, dual-slot graphics cards. The highest-performing Intel® NUC yet is engineered to win with the latest components and faster connectivity for wired and wireless gaming.

Kits are available with an Intel® Core™ i9 or i7 processor to build out with graphics, memory, storage, and OS for optimum gameplay. Customizable RGB underglow lighting with a replaceable RGB front logo makes it the ultimate rig for making a statement, from dominating enemies to gaming in style. Plenty of I/O options, a big, highly efficient power supply, and a modular design allows massive storage for more games, lots of memory for increased responsiveness and higher frame rate in gameplay, and room to grow and upgrade with swappable components.

Intel® NUC 11 Extreme Kits may be tiny but deliver outsized performance. With capabilities typically found in towers, such as support for triple 4K monitors and built-in cooling—all packed into a mere 8 liters—the Intel NUC 11 Extreme kit is designed for immersive gaming experiences without dominating the deskspace. For performance, connectivity, and modularity, this kit is hard to beat.
